

Borderless

Company Description

Borderless Inc. is a company that designs and engineers products that combine cutting edge smart technology, the highest levels of safety, and sleek visual design. Current Borderless Inc. brands include the motorcycle smart helmet brand CrossHelmet, and the industrial safety helmet brand CrossWare.

CrossHelmet's flagship product is the CrossHelmet X1, which debuted at the EICMA Motorcycle Show 2018 in Milan, Italy. The helmet combines the safety of motorcycle helmets with the convenience of smart devices, and is equipped with an augmented reality HUD, integrated rear-camera, touch pad, safety lights, and high quality built in speakers. Features include a 360° field of vision, hands free voice commands, navigation assistance, bluetooth connection with smart devices for making calls & listening to audio, and more.

Borderless also developed an official CrossHelmet app, that allows users to customize the features of their CrossHelmet.

Under Crossware, Borderless is currently prototyping a next generation smart safety helmet for use in construction and industrial environments. The helmet aims to streamline and improve workflow while still providing the utmost level of safety.
