

MUSO Co.,Ltd

Company Description

MUSO is working on establishing an international network of organic food producers.

MUSO's objectives are to supply the HIGHEST QUALITY NATURAL FOODS, and in so doing, to contribute to a more healthy and happy world.

Since 1969, the MUSO company has been dedicated to selecting the best quality traditional foods and supplying these items to our customers throughout the world.

We recognize the value of local and regional agriculture, and have always searched for the best quality traditional food manufacturers who have demonstrated their skill in making the highest quality products. We encourage the development of small local organic farms and have attempted to create a global market for these products. We have supported organic soybean farmers in the United States who provide their crops to Japanese manufacturers of organic products. We have supported and encouraged the production of traditionally brewed organic soy products made by small Japanese craftsmen for the markets of Western Countries. And we have invested in organic farms in mainland China that are now growing produce for the Japanese natural foods market.

We sincerely appreciate your efforts in helping us realize our mutual goals of establishing organic farming practices and providing the best quality foods to all our customers. We know that only by working together will we be able to realize our highest ideals for the health of our planet.

We look forward to strengthening our working relationship with you, and continuing to supply you with the highest quality traditional Japanese natural foods for the next 100 years.
