ONE ACT

One Act, Inc.

Company Description

ONE ACT is a global startup engaged in software development and AI technology development. Headquarters in Japan, it has offices in France, India, the UK, and the US.

Our main service, "PieceX", is the world's first AI-powered source code marketplace. By trading high-quality source code (text files of computer programs) globally, it revolutionizes the traditional software development process.

Buyer companies (any business or software development companies) can purchase ready-to-use software components with a guarantee, eliminating the need to develop software from scratch, and reducing traditional software development time and costs by over 80%.

Seller companies (software development companies or businesses that own the copyright to source code) can generate new recurring revenue directly from the source code itself and engage in high-profit-margin business.

PieceX already has a track record of transactions in more than 200 countries and regions worldwide, and by becoming an innovative web infrastructure that enables anyone in the world to quickly develop new services, it is creating a new economy in the world.
