Essex Solutions japan

Company Description

Essex Solution Japan is the only magnet wire provider able to completely source, develop, and deliver products to our customers, worldwide.

- **Vertical Integration**
  Maintaining control over your supply chain is critical to ensuring the highest standards of production while minimizing manufacturing downtime. Essex Solutions Japan maintains supply continuity through vertical integration capability. At Essex Solutions Japan, vertical integration not only delivers greater control of our supply chain, but also allows for greater flexibility in innovation at every phase. When combined together, our customers are better able to manage their product's efficiency and performance throughout the entire production process with little risk of schedule setbacks.

- **124 Years Of Experience**
  Since 1896, we have forged a path by meeting magnet wire and cable requirements for the automotive, industrial, commercial & residential, energy, and communications markets. Today we continue to expand our product portfolio globally, with new innovations and manufacturing throughout North America, Europe, Asia and Japan. Thanks to strategic acquisitions centering on enamel and wire development, distribution, and a focus on automotive sector expansion, Essex Solutions Japan has positioned itself as the leader in magnet wire product innovation and manufacturing.

- **Global Delivery**
  Essex Solutions Japan is a world-leading manufacturer and distributor of magnet wire. With facilities in seven countries on three continents, we are the only magnet wire manufacturer able to provide speedy delivery of quality products wherever you need them.
  Our seamless relationship between production and distribution is just one of the reasons Essex Solutions Japan leads the industry.
