

PALTEK CORPORATION

Company Description

Since its establishment in 1982, PALTEK has been providing semiconductor and design software sales and technical support services to Japanese electronics manufacturers. We will find excellent technologies and products that are born in various parts of the world, provide them to customers who need them as timely and optimal solutions, and contribute to their development.

ESG Initiatives

PALTEK promotes its business activities with the management philosophy of "coexistence with diverse beings." Today's society is an era in which various companies cooperate with each other, not all in one company. It is indispensable to bring together the strengths of each company, seriously face social issues, and work together to resolve them. PALTEK will contribute to the construction of a sustainable society by coexisting with diverse beings.
