Asus Japan Ltd.

Company Description

Ths world's most admired innovative leading technology enterprise in a new digital era

Established in 1989, ASUS is a multinational company known for the world’s best motherboards and high-quality personal computers, monitors, graphics cards, routers and other technology solutions. Today, ASUS is designing and building next-generation smart technologies to provide incredible experiences that enhance the lives of people everywhere.

ASUS is passionate about technology and driven by innovation. We dream, we dare and we strive to create an effortless and joyful digital life for everyone. We're always in search of incredible ideas and experiences, and we aspire to deliver the incredible in everything we do.

ASUS has developed a unique framework that unites our global workforce and helps all ASUS employees excel in both their professional and personal lives. It establishes a common language for bringing together our international and diverse workforce of more than 14,500 employees, spread across 62 global offices. We call this framework ASUS DNA. In the ASUS DNA framework, there are four pillars that provide touchstones for success as individuals and as an organization. When combined, they help keep our global organization focused on its primary goal of becoming the world’s most admired innovative leading technology enterprise in a new digital era.
