# SENSYN ROBOTICS, Inc.

## Company Description

**"Innovating Society" with industry leading robotics technology**

**We are evolving what is considered “commonplace” in society with the power of robotics.**

SENSYN ROBTOICS continues to tackle the pressing specific social challenges in front of us in various areas centered on facility inspections,
disaster measures, and security and monitoring.We do this by fully automating operations with the power of robotics.

**Values :**

**1.Safety First**
We provide services with safety first to our customers. We develop reliable long-term customer-friendly services as a member of a company that provides safe and secure solutions.

**2.Think & Hack**
We continue to be an organization that keeps thinking seriously to be able to continue providing the best solutions. We bring about innovation by confronting social challenges with the power of robotics without being constrained by common or accepted practices.

**3.Empower People**
We diligently apply ourselves together with our colleagues who sympathize with our desire to solve pressing social challenges. We believe that our power and the power of our team can move society.
