## MMSL Japan Ltd

---

### Company Description

We, "MMSL Japan Ltd." (formerly "Koyo Line, Ltd." until April 2014), have been in the field of ocean going vessels' technical/commercial management and sales of marine equipments/machineries, where our mission is to achieve "safety", "environment-conscious" and "customers satisfaction" at the same time.

When we take a glance at today's world politics and economy, there are large and many uncertainties which could uncountably influence the future of maritime and ship building industries. However, our commitment to "safety", "environment-conscious" and "customers satisfaction" will never be unsolid under any circumstances. We will also continue to be the great "challenger" who should flexibly follow various changes as the time requires and always contribute to our evolving industries.
