SEKISUI FULLER 積水フーラー株式会社
Adhesives That Innovate

Sekisui Fuller Co., Ltd.

Company Description

Sekisui Fuller was established in 2005 as a joint venture between Sekisui Chemical (Japan) and H.B. Fuller (U.S.A.). As a dynamic “hybrid” company, we leverage the advanced technology and business capabilities of both parent companies to provide innovative adhesive solutions that enhance the performance of our customers’ products across many markets: Hygiene, Packaging and Converting, Housing Construction, Durable Assembly, Electronics, Automobile and many others.

Our commitment to innovation has enabled Sekisui Fuller to create new adhesives that solve our customer’s complex problems while ensuring they are simple to use and offer superior value. As a market leader, our committed employees take great pride in exceeding our customer’s expectations each day with consistent, high-quality manufacturing in Japan and responding to inquiries efficiently and with great care. Whether our customer has an adhesive need in Japan or anywhere in the world, our philosophy of teamwork allows seamless connection with our global Sekisui Chemical and H.B. Fuller colleagues world-wide to ensure a speedy and comprehensive response.

Finally, it is our core Sekisui Fuller principle that we conduct our business ethically with high integrity and strict compliance to the law. We respect all individuals we encounter and cherish the opportunity to contribute to society’s advancement while preserving our precious natural environment.
