

永峰・三島コンサルティング

JCAccounting KK

Company Description

When Mishima and I founded this company in 1989, we pledged to be a premiere tax and accounting resource for global companies. We understood that even though the rewards are great, there are also many challenges for companies doing business in Japan. For companies in the start-up phase, for example, the expats and the corporations must deal with unfamiliar and complex tax codes. In addition to registration and hiring, new companies must also navigate a unique payroll and social insurance system.

Once businesses are established, the challenges multiply, from audits that focus on transfer pricing with the parent company to restructuring that accompanies growth to training employees and installing an effective ERP system.

We are committed to helping you overcome these challenges and create a successful global business. For over 25 years, we've focused on hiring bilingual tax and accounting professionals with the skill sets you need to maximize your efficiency. Everything we do, from our accessibility to our custom accounting for crisis support is geared toward helping your business succeed in Japan.
