

SAYAKA Co. Ltd.

Company Description

High touch - High tech is Management Principle of SAYAKA.

We are aiming at an enterprise to deepen a reliable relationship among human beings/companies and continue challenging for unlimited possibility of technology.

Our motto is also to climb up stairs step by step and attain "reliability of products". On the one hand, it is reliability of our products and on the other hand it is to be of service to reliability of products made by customers. The sales point of our PCB SEPARATORS exists in the concept of "being cut with safety" whatsoever.

In addition to that concept, we are determined to further challenge for new technical development.

Requirements by customers are the staff of our development.
