

castLabs

Company Description

Our mission is to push the limits of digital content distribution while making it accessible.

castLabs pioneers software and cloud services for digital video markets worldwide. We provide solutions to easily enable the secure distribution of premium movie, TV, and audio assets for high-quality video experiences.

Our range of applications and services are designed to help businesses deliver DRM-protected content over a large selection of consumer devices and platforms:

- PRESTOplay: video player SDKs across HTML5/JavaScript platforms as well as Android and iOS devices
- DRMtoday: multi-DRM License Delivery Network cloud service and CAS licensing
- Video Toolkit: robust cloud encoding, packaging, encryption, and watermarking
- Widevine device and app certification as a Third Party Labs (3PL) partner selected by Google
- End-to-end technical consulting for encrypted video playback integrations and projects.
