

Splice Sleeve Japan, Ltd.

Company Description

THE BEST SOLUTION FOR PRECAST & CAST-IN-PLACE CONSTRUCTION

ABOUT US

The NMB Splice Sleeve System was created over 40 years ago by Dr. Alfred A. Yee, an accomplished American structural engineer. We continue to develop and offer this system as a solution for today's challenging construction requirements.

NMB Splice Sleeves are used extensively in residential and commercial concrete structures in the United States, Japan and Singapore. Additionally, NMB Splice Sleeves are used in a variety of construction projects all over the globe.
