

Mayr Japan LLC

Company Description

Mayr's products have been developed based on more than 125 years accumulated experience, and high quality, high precision, and high durability have made our reputation very high. We ensure 100% traceability of own products. Our transmission products of safety brakes, torque limiters, and couplings have wide applications in industrial machines such as elevators, wind turbines, theatre stages, machine tools, cranes, test equipment, drilling machines, arms of industrial robot, to ensure safety of machines and users. Especially we enjoy the market leading position in brakes for elevators. Mayr has developed its business through distributor in Japan for quite a long time, and many Japanese companies use our products as critical parts. In 2020, Mayr Japan LLC, a Japanese legal entity, was established in order to increase further market penetration and strengthen customer support.
