

Standex Electronics Japan株式会社

Company Description

Customer needs for reed switches are becoming increasingly diverse, and include demands for greater compactness, lower cost, higher functionality, and stable product supply. Standex Electronics Japan is a specialty manufacturer of reed switches and related products developed specifically to respond to these user needs.

We are meeting the challenge of developing products and production technology for a new era -- with our own unique production technology, state-of-the-art production equipment and a diverse product line in the area of reed switches. In the future, we will continue to provide high-quality reed switches and related application products, and thereby support superior product development by our customers.
