

OSIsoft Japan K.K.

Company Description

A proven leader in enabling operational intelligence

We deliver an open enterprise infrastructure, the PI System, to connect sensor-based data, systems and people. The result: real-time, actionable insights that empower companies to optimize and transform their business.

OSIsoft has installations in 127 countries and is widely used across manufacturing, energy, utilities, pharmaceuticals, life sciences, data centers, facilities and the process industries, as well as the public sector and the federal government. OSIsoft is headquartered in San Leandro, California, U.S.A, with offices around the world.
