

AM Solution co., Ltd.

Company Description

AM's foundation principle is "Technology is Human". AM tries to be the one treating human with more consideration as well as the one in which the best engineers want to work. AM was established with talented people of the telecommunication industry in 2001. AM has developed mobile phones from the beginning, entered the M2M module business in 2006, and commercialized the world's first dual mode (3G+TRS) mobile phone in 2008.

AM has been expanding its business to Telematics products and IT convergence products based on M2M modules as core businesses. Especially AM's M2M modules could be widely used in any telecommunication circumstances from CDMA to LTE, and they proved the outstanding product quality through various applications (telecommunication system, security system, Telematics system, healthcare system, smart grid and so on). AM will serve state-of-the-art technology and service with flexible organization valuing creativity. In addition, AM will carry on as a leading technology company with advanced mobile technology and cultural innovation.
