ARTNER CO., LTD.

Company Description

We are determined to become a group of engineers providing the greatest added value in the industry as a visionary company continuing its journey to its 100th anniversary in 2062.

Artner Co., Ltd., celebrated its 60th anniversary on September 18, 2022. We feel great joy and satisfaction in celebrating our milestone year as we grow day by day. We would like to take this opportunity to thank everyone involved for their continued support.

Ever since a design firm was started by our founder, we have made continual changes in our mindset to cater to the evolving trends of the times, eventually developing our current business model as a technical service provider.

While hoping that engineers will continue to pursue self-actualization and self-growth, Artner will persistently develop an environment that supports engineers. We wish to maintain such a relationship between engineers and Artner.

We aspire to become a group of engineers that is recognized, by both ourselves and others, as a provider of the greatest added value in the industry. Furthermore, in the medium to long term, we aim to establish new areas of expertise, mainly centered around M&A initiatives, to grow into a comprehensive technical service company.

Meanwhile, as our social environment changes on a global scale, addressing social issues has become an important managerial task for companies in general. With carbon neutrality as one of the pillars of our Medium-Term Business Plan, we are committed to solving social issues through our business activities.

As a visionary company heading toward its 100th anniversary in 2062, we are now in charge of this era. As we pass the baton to our next generation, we believe that it is our responsibility to develop our business environment, and foster a corporate culture that is always responsive to changing market needs. We believe that if we can pass this corporate culture on to future generations,
we will be a company that grows sustainably over 100 years or even longer.
