

KYORITSU SEIKI Co.,LTD.

Company Description

Opening the Future Together
with Technology and Quality

Since our founding in 1960, we have been involved in the processing of precision parts used in automobile footholds. Our products are very important products used in automobiles carrying human lives. For this reason, we are constantly working to innovate and improve quality with a sense of tension and responsibility that entrusts many human lives who use the products of automakers that are our customers.

The industry related to the automobile industry is expected to change rapidly in the future and competition will become increasingly intense. That is why we will boldly take on new challenges and grow faster than ever to continue providing the highest quality products that meet the needs of our customers.

As a member of society, we are also involved in activities aimed at sustainable development, such as efforts to curb global warming and protect the environment. We will also fulfill our social responsibilities as a company through contributions to local communities.

In order to continue to contribute to local communities and customers, we will innovate in technology, provide products of the quality demanded by society, and work together to cultivate our future.
