

Charles Taylor Consulting (Japan) Ltd

Company Description

Charles Taylor provides a growing range of insurance services, claims and technology solutions across the global insurance market.

What makes us special

Our unmatched depth of **specialist expertise**, from loss adjusters to forensic accountants, helps the global insurance market to address its challenges. Through our **trusted partnerships** model, we build long-term, personal relationships with clients based on trust and cooperation. Our **powerful technology** helps our clients improve their customers' experience from start to finish. Thanks to our **global reach**, our clients can access our services wherever they are in the world, whenever they need us.

Our history

Our company dates to 1884, when a group of shipowners set up a mutual insurance association. Charles Taylor, a trusted coal merchant, was appointed to oversee the funds and manage their claims. His astute management paved the way for future expansion.

Today, our clients benefit from years of expertise and global network. We handle claims from end to end, establish and manage insurers, and implement technology solutions the world over.
