

Greenvolt Solar Japan K.K.

Company Description

We are a renewables company delivering 100% green power through multiple technologies across several geographies. To deliver green energy, we value forest residues, and we harness the power of wind and the heat of the sun.

Our purpose is to create sustainable value from the sun, wind, and forests, for the benefit of society, shareholders and employees.

Greenvolt is increasingly recognised in the Global Market as a major player in the promotion and development of wind and solar projects. Our company has been growing at a fast pace in three different sectors: biomass, wind & solar and distributed generation.

Greenvolt Group counts with employees from more than 25 different nationalities and our talent is spread across continents in 12 geographies
