

Engage Squared KK

Company Description

Engage Squared is on a mission to empower employees to enjoy work more - using Microsoft tools to make work more productive, collaborative and connected.

We work with large organisations to empower teams and individuals to use new technology to work productively (by migrating to O365, undertaking adoption and change management campaigns and / or configuring information and records management solutions), to help their leaders connect with their staff (by developing powerful new Intranets and digital workplaces built on modern SharePoint, and by rolling out Yammer), and to tailor Office 365 workloads to boost productivity (using all of the Microsoft 365 suite, including PowerApps and Power Automate).

Our values lie in our tenacity, sincerity, creativity, and agility, working alongside you in deploying the most beautiful modern intranets and Microsoft solutions to suit your company's needs. We work closely with our customers on user experience design, solution development, technology change and successful digital adoption.
