ポリマライズ

Company Description

POLYMERIZE (https://polymerize.io/) is a material informatics platform provider based in Singapore, operating globally including in Singapore, India, and Japan. The demand for high-performance materials is higher than ever, and research and development teams at our client chemical manufacturers require integrated data management solutions to accelerate material innovation. Through our cloud-based platform, research and development teams organize experimental data and insights, improve productivity, and promote collaboration across different countries and regions. Additionally, by utilizing our proprietary AI engine, they can optimize raw material compositions and manufacturing conditions, thereby reducing research and development time and costs.

We have a strong pipeline of clients in the chemical industry, including leading companies in Japan, and we are a rapidly growing company. By collaborating with industry-leading companies alongside POLYMERIZE's global team, we can contribute to a wide range of industries by shaping the next stage of material development.
