

ERIEZ

ERIEZ MAGNETICS JAPAN CO.,LTD.

Company Description

Established in 1969 by Eriez Manufacturing Company of the United States, the world's leading authority on magnetic separation products, Eriez Magnetics Japan Co., Ltd. is a wholly owned Japanese subsidiary of Eriez of the United States.

Eriez Magnetics Japan manufactures and sells a variety of magnetic separators, eddy current nonferrous metal separators (aluminum separators), electromagnetic vibrating feeders that combine electromagnets and permanent magnets, and various types of metal detectors in various industries, including the environmental and recycling industry, the chemical industry, the glass and ceramics industry, and the food industry..

Celebrating its 50th anniversary, we have a diverse range of needs from domestic industries on the strength of its high technological capabilities and extensive product lineup backed by its history.

In addition, our Urayasu head office is equipped with a variety of testing machines, and we are always ready to conduct sample tests using these machines so that we can select the optimum model to meet your various needs.

We will continue to make further efforts so that Eriez products can be of service to customers in various industries that require higher quality, higher efficiency, and lower cost.
