

H&R Japan Ltd.

Company Description

As a specialty chemicals company, the H&R Group is active worldwide in the development and manufacture of crude oil-based specialty chemical and pharmaceutical products and in the production of precision plastic parts. In the individual business areas, the Group companies are promisingly positioned as market and/or technology leaders.

Every day, more than 1,700 employees worldwide develop, produce and sell the products of the H&R Group.

The motivation and qualifications of our employees are crucial to the company's success. We want to create a positive working environment and support team spirit, commitment and responsible action.
