

## TransPak Japan GK

---

### Company Description

#### **About TransPak**

Founded in 1952, **TransPak** is a global leader in custom packaging, crating, and logistics solutions. With decades of experience supporting high-tech, semiconductor, industrial equipment, and aerospace customers, TransPak specializes in designing and delivering **engineered packaging solutions that protect critical assets throughout the global supply chain.**

TransPak provides end-to-end services, including packaging design, custom crating, cleanroom packaging, on-site services, and global logistics coordination. Our engineering-driven approach ensures that each solution meets customer requirements for performance, safety, sustainability, and cost efficiency.

Today, TransPak operates across North America, Asia, and Europe, supporting customers worldwide with local expertise and global standards.

#### **About TransPak Japan GK**

**TransPak Japan GK** is a newly established entity created to expand TransPak's presence and engineering capabilities in Japan.

As a growing organization, TransPak Japan focuses on delivering **high-quality, customized packaging and engineering solutions** tailored to the needs of Japanese customers, while leveraging TransPak's global engineering expertise, proven processes, and international network.

Our mission in Japan is not only to provide packaging services, but to become a trusted engineering partner — working closely with customers from design through execution, and continuously improving packaging solutions for global transportation.

As we continue to grow, we are building a local team that values hands-on engineering, collaboration, and ownership.
