# Ciel Terre Japan Co.,Ltd.

## Company Description

**WE MAKE**
**RENEWABLE ENERGY**
**A REALITY.**

Founded in 2006, Ciel & Terre specializes in deploying floating solar power plants. Responding to the urgent global need for cleaner, more efficient and economical energy, we developed roof-mounted solar plants, followed by our patented floating PV Hydrelio® technology in 2011. We have continued to focus on floating PV since, and on the creation of ground-breaking, human-friendly, biodiversity-friendly solutions to meet the challenges of the future.

Our reputation as a world leader in floating solar technology is built on over 300 successful projects around the globe. Above all, we don’t sell a product – we provide a complete solution and contribute directly to your project. Thanks to our unique engineering expertise, we assist you with every stage of the process, from the deployment to the installation of your floating solar plant. We have the experience and know-how required to develop projects that are both viable and profitable for every stakeholder involved.
We are present in 8 countries and maintain direct links with a network of 19 partners, enabling us to provide you with unrivaled support in the development of floating solar installations.

## Company Details

**Head Office**
Japan

**Main Business**
水上太陽光発電所の展開

**Established**
2006年
