

Togami Electric Mfg. Co., Ltd

Company Description

「Evolving with creativity and ingenuity to meet the needs of our customers」

Togami Electric Mfg. Co., Ltd. was founded in 1925 as a manufacturer and vendor of "automatic night/day selector switches for distribution lines." Since then, we have evolved as a manufacturer that supports the stable supply of power, celebrating our 90th anniversary in 2015.

This prestigious history is the result of the guidance and support of our customers and partners.

Today, our business domains encompass a wide range of activities, from the design and manufacture of medium-voltage power distribution control devices, measuring devices and detectors, switchboards and water, treatment equipment to total solutions in photovoltaic (PV) power generation systems, such as design, proposal, installation, and inspection.

We will continue to move forward to achieve our corporate philosophy of "make the society, the Earth, and the future affluent" through our creativity and ingenuity to increase our corporate value and evolve into a company that can meet the various needs of our customers and society.
