

INTERCHIP CORPORATION.

Company Description

Development, design, manufacture and sale of semiconductor integrated circuits

Interchip is a fabless semiconductor company. Production is outsourced domestically and internationally, allowing us to concentrate on designing a wide variety of integrated circuits. Our main products are products that combine crystal oscillator circuits and various output circuits, and products that combine adjustment circuits and non-volatile memory. Years of experience enable us to respond quickly to market and customer needs.

Company Details

Head Office
Japan

Main Business
半導体集積回路の開発・設計・製造・販売

President
有吉 竜司

Established
平成10年10月22日

Capital
8,250万円

Number of Employees
11 - 50

URL
https://www.interchip.co.jp/

Offices

Main Office
Mitsui Sumitomo Banking Corporation Ningyocho Building 7F
5-7, Nihonbashi Odenmacho, Chuo-ku
Tokyo, Japan, 1030011
