NEXGEN Inc.

Company Description

NEXGEN - Accelerating the Change

Our company leverages a global network, including our base in India, to provide technological resources such as Cloud, IoT, and AI—mainly to large multinational corporations. Our bilingual (Japanese-English) team supports clients in streamlining their systems, reducing costs, and driving digital transformation. Utilizing our international connections, we help enhance competitiveness on a global scale.

Our sales representatives and approximately 200 engineers work closely together to deliver staffing services, system engineering services (SES), outsourced development, and offshore development. We mainly offer solutions in areas such as SAP, web systems, and cloud technologies. Within the company, both Japanese and English are used in daily communication, and we foster a casual, open, and family-like work environment.
