

Dr. Japan Co., Ltd.

Company Description

Contribution to medical care, culture, and environment

Dr. Japan has been manufacturing and selling medical equipment with Japanese quality, mainly anesthesia needles and biopsy needles.

Reasons for choosing Dr. Japan

World-class technology

By using the unique technological capabilities, we perform metal microfabrication mainly on special needles for medical use. We can provide customized product such as changing the needle tip, bending, drilling, and surface processing according to customer's requirement.

Japanese quality, safe, secure and high quality

Dr. Japan products are mainly designed and manufactured in Japan. We deliver high quality products both domestically and internationally with a mission to provide our customers with piece of mind and reliability.

Best bet for OEM / ODM

From the experience of producing Dr. Japan brand, we are capable of producing medical devices on an OEM/ODM basis as well. We can provide a full range of services, from design to sterilization

Dr. Japan was established in 1988 based on the idea of contributing to "medical care, culture, and the environment."

With the mission of "providing trust and peace of mind to our customers,"

We are developing high quality products not only in Japan but all over the world.
