

Samsung SDI Japan Co., Ltd.

Company Description

**SAMSUNG SDI will make the world greener
and sustainable through our innovative technology.**

Greetings and thanks for visiting SAMSUNG SDI's official website.
This is CEO Yoon Ho Choi.

Pivoting on two pillars of green energy and cutting-edge materials, SAMSUNG SDI provides solutions for rechargeable batteries that power electric vehicle, IT, energy storage systems (ESS), as well as materials used in semiconductors, displays and batteries.

SAMSUNG SDI strives to become a 'Global Top Tier Company by 2030', by driving Super gap Technological Competitiveness, The Best Quality, and A Profitable Qualitative Growth.

We also remain committed to bolstering a full spectrum of environmental, social and corporate governance (ESG) practices as we continue our efforts in not only environment-friendly management but also safety environment, co-prosperity and social contributions.
