

I-PEX Inc.

Company Description

I-PEX, Experts in Manufacturing Solutions

I-PEX represents experts in manufacturing solutions providing value in the form of inspiration and astonishment in the global marketplace.

We continue to seek, create and make proposals from a sharp perspective in a niche market. We achieve this through the spirit of taking on challenges without fear of failure and an untiring spirit of inquiry and flexibility, a fusion of various values and skills, and the pursuit of localization. Under speedy and flexible manufacturing systems, we will work with customers who will open up the next generation of products at the world's sharpest tip, crossing industries and areas, to imagine a better future and support the product development that people love.

Our Origin

In 1963, I-PEX was born in Kyoto as "Dai-Ichi Seiko," a precision mold manufacturer.

We have worked hard to manufacture products with a high degree of difficulty through the development of technologies centered on in-house production of molds and manufacturing equipment, and have developed a number of world-first and unique products and solutions.

To be the Sharpest

By embodying the I-PEX brand and creating original value that surpasses the imagination of customers, each of us contribute to dramatic growth as a partner that is the first choice of customers.

Business Introduction

We develop, manufacture and sell connectors, sensors and semiconductor manufacturing equipment under the I-PEX brand. We also manufacture automotive parts, precision molded parts and various manufacturing equipment on a contract basis and supply them to the market.

Global Expansion

We have 38 base locations in 12 countries/regions around the world, and are engaged in business for our customers on a global scale.
