

FURUKAWA AUTOMOTIVE SYSTEMS INC.

Company Description

Since its establishment in 1950, Furukawa Automotive Systems Inc. has supported the automotive-parts operations of the Furukawa Electric Group, with focus on products such as wire harnesses and functional components. Today the Company's operations span the globe, with 27 locations in Japan and 24 locations in 12 countries and regions abroad.

Today the automotive industry is undergoing a once-in-a-century transformation. To prevail in a business environment characterized by accelerating moves toward electrification and automation, Furukawa AS is formulating a business strategy and roadmap designed to achieve its target state for 2030.

Marshaling the combined strengths of the Furukawa AS Group, Furukawa AS is moving resolutely forward to achieve a vision that consists of four parts: anticipating coming trends from a customer-first perspective; embracing the challenges of transformation; constant improvement, never satisfied with the status quo; and solving problems through teamwork.

With business continuity and growth as core objectives, the Company acts according to three key principles:

- 1) Placing top priority on safety and health in all things
- 2) Maintaining strict compliance and fulfilling corporate social responsibilities
- 3) Insisting on design quality and production quality without compromise, to serve customers with products they can trust

“A Bright Future for People and Mobility.”

Furukawa AS is contributing more than ever to the advancement of carbon neutrality, safety and peace of mind, and a society of convenient and comfortable mobility. As we tackle these challenges, I ask all stakeholders for your continued support and encouragement.
