At a Glance

- Focus on Asian growth cities

Currently operating in 18 Asian growth cities, our focus is on growing cities in Asia with high level of commercial activities and job opportunities, a large and growing population with a large labour force and young population demographics.

- Leading productivity and profitability through our entrepreneurial co-ownership business model and lean structure

We have leading productivity and profitability as compared to our global and regional competitors. Many of our leaders and business pioneers have personally invested in the share capital of our subsidiaries.

- Strong growth and profitability since inception

Our resilience has been proven by our strong financial performance since inception, demonstrated through overall top-line and bottom-line growth over more than 30 years of operations, as well as achieved through our strong relationship with customers, diversified business model and strategic expansion across Asian growth cities.

- Growth powered by twin engines of complementary businesses

Our synergistic and balanced business model is supported by two complementary businesses, with flexible staffing business providing a relatively stable and steady revenue stream in economic downturn, while the professional recruitment business generally performs well during periods of economic growth. The provision of both services allows us to offer comprehensive recruitment solutions to our customers.
