VAT Japan Ltd.

Company Description

Trusted by the very best

When you are operating in the world's most dynamic industries, you need a partner you can rely on.

Manufacturing technologies such as semiconductors, displays and solar cells require an ultra-clean, ultra-high-vacuum environment. VAT has earned the trust of organizations seeking mission-critical components for manufacturing, research, and development under the most rigorous conditions.

Our customers know that with our innovation, engineering excellence, and by listening, we'll meet and anticipate their needs in the world's most challenging and rapidly evolving markets.

By continually earning and re-earning this trust, we've become the world leader in vacuum valves and related technologies. Here are six reasons why VAT is trusted by the very best.
