Nakashima Seisakusho CO,.LTD.

Company Description

Since our founding in 1961, we have been providing products that meet the needs of our customers with original technology. In recent years, we have actively promoted global expansion, mainly in East Asia and Southeast Asia, and our AMO products have become widely recognized overseas. We believe that this is because we have caught the product needs of our customers in the field of powder and granular weight packaging and have been quick to provide product development and services that are on the customer's side. In the future, we will continue to provide products and total systems that meet our customers' needs quickly, based on the packaging and transportation technology we have cultivated in the fields of flour, starch, and other foods, as well as chemicals and minerals.

At AMO, we are committed to "environmental conservation and energy conservation," and we would like to contribute to society by providing "improved customer satisfaction" and "safe and better products."
