金発科技JAPAN株式会社

Company Description

Kingfa is a globally preeminent supplier of advanced materials. Based on research, manufacture, sales and services of innovative materials, Kingfa provides new solutions to create a safer, more comfortable and convenient life.

Headquartered in Guangzhou Science City, Kingfa owns 60 subsidiaries, our R&D and production bases are established in overseas regions including South Asia, North America and Europe. The products of Kingfa mainly rely on independent innovation and development, covering eight categories with independent intellectual property rights including modified plastics, eco-friendly high-performance recycled plastics, fully biodegradable plastics, specialty engineering plastics, carbon fiber and composite materials, light hydrocarbon and hydrogen energy, high-performance resins,medical and healthcare polymer materials. With its good environmental friendliness and excellent performance, Kingfa's materials are exported to over 130 countries and regions, serving more than 1,000 well-known companies around the world.

Kingfa is committed to solve the increasingly serious environmental problems our planet is facing, and we are following the principles of sustainable development, eager to find a balance between economic, environmental and social sustainability.
