DCSS TECHNOLOGY JAPAN

DCSS Technology Japan Co., Ltd.

Company Description

Incorporated in Singapore in 2011, DCSS Technology started as an Independent service provider for enterprise systems support services specializing in hardware maintenance services, and since then we have broadened our expertise to provide enterprise solutions and services covering system integration services, operating system services, managed IT services and professional services covering all major OEM brands from industry-leading vendors.

DCSS stands for Data Center Solutions and Services. Our tagline or mission is Encompassing Global “IT” Solutions. The past few years our business have branched into Hong Kong, Malaysia, Thailand, and Indonesia.

Such rapid growth was achieved by our team of experience individuals who possesses expertise in strategy, sales, customer experience, technical and product knowledge. We continue to invest in our employees because we believe that our people are our greatest asset. At DCSS Technology, we strive to exceed the expectations of our clients in order to create trust between our clients and us. We aim to ensure that our customers are able to rely on us for their data centre requirements. Our large team of engineers enables us to provide maintenance coverage to more than 10,000 systems (servers, storages, and networking switches) in the Asia Pacific region across various industries.
