

PADECO Co., Ltd.

Company Description

PADECO was founded in 1983 to address global challenges and has been contributing to international development for more than 40 years. With its experience and record of achievements, PADECO has become an internationally recognized development consulting firm.

The world is changing fast, and in the near future we can expect to fully enter a global era in which the distinction between domestic and overseas operations is no longer relevant. To compete globally in this environment, PADECO became a group company of Pacific Consultants in December 2023. We are convinced that by joining forces, Pacific Consultants, one of the leading construction consulting firms in Japan, and PADECO, with its wealth of experience in providing overseas development consulting services, will be able to increasingly add value and offer innovative solutions to the world.

Going forward, PADECO will continue to take on the challenge of solving problems in various fields around the world and contribute to the creation of a better global society.

Our Mission

Our mission is to provide truly professional consulting to satisfy our clients, and by doing so, translate the philosophy of the Sustainable Development Goals (SDGs) into concrete action(s) and strive to contribute to the development of the world.

PADECO'S CORE VALUES

Brochure

PAn DEvelopment Consultants for present and future generations

"Seek new frontiers"

"Respect diversity"

Our Approach

A multi-disciplinary and multi-cultural background

While an individual is capable of providing results, the results of a team of capable multi-disciplinary individuals are far beyond the sum of each. Our multi-cultured international staff strive to satisfy clients by not only relying on our specialties and backgrounds but also those of others in the world whenever appropriate.

Our open culture encourages staff to seek answers in order to leverage the knowledge of our entire organization and beyond.

Pursuing professional answers applicable in particular environments

Diverse projects call for creative solutions. Our client-focused and open attitude breed flexible solutions in addressing today's most challenging problems by providing professional answers that are of universal excellence applicable to particular environment.

Quality Policy

January, 2012 Acquired ISO 9001 certification, an international standard for quality management system, at Tokyo Head Office.

Our mission is to work for our clients' and beneficiaries' satisfaction and help make the world more livable. To realize it, we have established our quality policy as follows:

- Based on client's needs, providing the most appropriate proposal and its realization contribute to the development of the world.
- To create universal values in the international community, continuous upgrading of provided services, and improvement of the work process and management are required.

Our Uniqueness and Strength

A Japan-based internationally recognized consulting firm

PADECO was established in 1983 as a group of multi-national professionals with extensive experience in international consulting. We have since grown into one of the leading internationally recognized consulting firms in Japan with a multi-national staff in offices throughout the world. We employ specialists in a diversity of fields including: engineering and project management in highways, ports, railways, water, and others, economics, climate change, transport, urban and regional planning, education, finance, social development, policy analysis, law, systems analysis, tourism, environment, institutional development, governance, information technology, project management, and other key sectors.

A diversity of clients

PADECO enjoys a wide client base in developed and developing countries focused on national and local governments as well as international and bilateral development agencies but we also provide services to private sector clients. Although the robust solutions we offer lead to a number of repeat clients, we also actively pursue new client opportunities. The diversity of our clients demands flexibility in project implementation in order to further the development of the world.

Action Policies of PADECO

1. Contribute through consulting business to community and international world
2. Try to preserve global environment
3. Comply with laws
4. Respect human rights
5. Make information public to make management more transparent
6. Select customers based on a fair standard
7. Conduct fair and free business activities
8. Properly manage and protect personal and confidential information
9. Confront any antisocial forces
