

## Classmethod, Inc.

### Company Description

We specialize in providing infrastructure support, including cloud environment management, for Japanese companies with global operations. Additionally, we assist overseas companies offering SaaS and other services in successfully entering the Japanese market.

#### 1. Global Cloud Management for Japan-based Companies

Classmethod's AWS Global Support Services comprehensively back global expansion efforts through multilingual technical assistance, cost optimization, compliance measures, and local staff training.

#### 2. Japan Entry for Global Tech Companies

Successfully entering the Japanese market requires not just a solid understanding of the local landscape but also tailored strategies to meet specific needs. With Classmethod's expertise, we help global tech companies leverage cloud resources efficiently within targeted regions or countries.

Our services are designed to ensure seamless adaptation to Japan's unique business environment, addressing local needs, regulatory requirements, and cultural nuances. By combining advanced technical solutions with deep market insights, we empower companies to establish a strong foothold and thrive in the Japanese market.

#### 3. Local Cloud Support for Overseas Companies

Offering consulting, marketing support, and new business development services for global tech companies seeking entry into the Japanese market
