

Og inc.

Company Description

Becoming bridge between the World and Japan

2014 – Established Og Co. Ltd with my childhood friend and started the Sakura Mobile business.

With my friend from childhood, I founded Og and started a new company under the brand name of "Sakura Mobile". Right now, there is a surge of foreign visitors coming to Japan, but not all are tourists, some are exchange students and some are coming for work, but whatever reason they are here for, I would like everyone to go back home having enjoyed Japan and wanting to come back again. I would love to work together and achieve something great with anyone who, with the Japanese concept of "Omotenashi" want to work globally and influence the world.
