

ASTRO GATE

ASTRO GATE Inc.

Company Description

Our Vision

Expanding Horizons with Spaceports

Ports have long been places of encounter where people, goods, and money gather. This port, which connects to space, is the gateway to humanity's last encounter with the frontier. A spaceport that connects not only space but anywhere on Earth within an hour will create new encounters that humans have never experienced and provide new value to humanity. We want to make this town, which has such a port, a place where you can encounter many opportunities.

What we do

Comprehensive support for spaceport and regional revitalization

ASTRO GATE is the world's first company to plan and operate multiple spaceports. We focus on the following three key business areas:

Spaceport Service

Providing comprehensive support for spaceport planning and operations worldwide.

Rocket Support Services

Providing support services related to rocket launches and transportation.

Space Business Consulting

Assisting companies considering entry into the space industry through research, consulting, and new business development support.
