

THI Japan Co., Ltd.

Company Description

Both import and export operations are based on three pillars—air transport, ocean transport, and logistics.

Air transport

We provide the best and most reliable products in all aspects of air transport to meet the needs of customers. Our seamless services from origin to destination are part of our own network. So, please feel free to contact us regardless of the type of cargo.

Ocean transport

LCL, FCL, and break-bulk cargo transport for import and export are offered within Asia and throughout the world using our own network. Additionally, our integrated transport services include customs clearance and delivery to meet any need. So, please feel free to contact us.

Logistics

By making full use of the infrastructure of experienced group companies in Japan, we offer logistics optimization for a wide range of products from apparel products to temperature-controlled transportation of food products for both B2B and B2C. We can provide highly productive, high quality transport and warehousing services for customers. So, please feel free to contact us.
