

TOKKYOKIKI Corporation.

Company Description

Founder Mr.Okamaoto determined the name of company "Tokkyokiki Corporation" to maintain "Spirit of New Creation" as the management philosophy. For more than fifty years since its establishment in 1969, Tokkyokiki have been continuing their operation as expert company for vibration control technology with "Unite three factors of On-Site, Customer, and Tokkyokiki", and working hard as the company of approaching scientifically toward vibration.

Typical examples of vibration troubles are "shaking of building structures by earthquakes and winds", "vibration excited by industrial machinery and construction facility", "micro vibration on precision equipment". Tokkyokiki will fully utilize total solution technology for these vibration related troubles, and continue to enhance its technology from the time of our founding to the present in order to resolve vibration issues which hinder customer's business objective.

As the President, I will take over the passion of the founder Mr.Okamoto and former president Tadahiko Okamoto for the vibration control, and with the beliefs below, I will work together all the employees to manage the business operations and contribute to the development of the industrial society.

1. To sustain to be the expert company for vibration control based upon our corporate philosophy.
2. To achieve customer's business objective with always standing in the customer's perspective.
3. To prioritize "on-site" and "actual solution".
4. To aim to be the enterprise with overwhelming presence as the technical excellence company.
