HouseRep Tokyo Inc.

Company Description

House Rep Co., Ltd. is a real estate company offering a wide range of specialized services in the luxury property market. The company's business operations are extensive, covering everything from the brokerage of high-end property sales in the Tokyo metropolitan area to the arrangement of luxury residential rentals for foreigners in Tokyo and Yokohama.

A key feature of the company is its comprehensive support system for foreign clients, particularly those working for corporations and embassies. The services extend beyond simple property brokerage to include property management, planning and proposing renovations, and providing consistent living support and consulting to ensure a smooth transition for new residents. This holistic approach ensures thorough post-move-in support and a complete service experience.

Furthermore, the company offers support to corporate Human Resources and General Affairs departments, helping them resolve real estate-related challenges. For multinational and foreign-capital companies, arranging housing for international employees is a crucial task, and House Rep provides solutions to alleviate this burden.

Communication with clients and the translation of property contract details are available entirely in English, enabling seamless transactions without a language barrier. Established in March 2010 with a capital of 9 million yen and a team of 11 employees, the company maintains a small but elite structure. By providing high-quality services, it has established a solid presence in Tokyo's luxury real estate market.
