# ZAMA Japan Kabushiki Kaisha

## Company Description

**Company Overview**
Established in 1952, ZAMA has delivered advanced technical expertise and high-quality precision metal products for over 70 years. As a foreign-affiliated company under Germany's Andreas STIHL AG, ZAMA has earned global recognition in the outdoor power equipment and recreational vehicle industries.

**Global Structure**
Headquartered in Hong Kong, the ZAMA Group operates production facilities in China and the Philippines, and maintains research and development centers in the United States and Japan. This global framework enables seamless integration across development, manufacturing, and quality control, ensuring agile and precise responses to market demands worldwide.

**Core Products and Technological Development**
While carburetors remain a core product, ZAMA has expanded its portfolio to include advanced electromechanical components and precision-machined parts, such as wire harnesses and solenoid valves. These products are highly valued in applications requiring environmental performance and operational reliability.

**Role of ZAMA Japan**
ZAMA Japan serves as the Group's research and development hub, leading product design and innovation. Through its technical excellence and rigorous quality standards, it plays a vital role in enhancing the competitiveness and technological advancement of the ZAMA Group globally.

## Company Details

**Head Office**
Japan

**Main Business**
キャブレター等の精密加工部品およびワイヤーハーネス等の電子電機部品の開発・試験および設計

**President**
戸田 衛

**Established**
1952

**Capital**
99,999,000

**Number of Employees**
11 - 50

**URL**
https://www.zamacorp.com/jp/

## Offices

**Main Office**
2-154-14 Ōbuke, Hachimantai-shi
Iwate, Japan, 0287111
