

Shanghai Time Chemicals Co., Ltd.

Company Description

Shanghai Time Chemicals Co., Ltd.(STC),established in January 2010, is a professional Chemicals enterprise, engaged in chemical export and import, OEM, Japanese chemicals supply, newly-chemicals R&D and sales. STC is specializing in Pharmaceutical raw materials and intermediates, API, Pesticide raw materials and intermediates, Electronic chemicals, Cosmetic Ingredients, functional material and chemical solvents. STC, in particular for convenient transportation and strategic location, is located in Jinshan District where there are many chemical companies, which is ca.60kms away from the Shanghai Pudong Airport or Shanghai Hongqiao Airport.

STC takes Quality and Technology as the most priority, it is striving to provide customers with high-quality products and service. The Company recruits many professionals returned from Japan, who are very familiar with chemical synthesis, plant management and GMP quality management. STC has strong relationship with many national Scientific research institutions, R&D center and other industries incubator base, which can meet different needs from lab scale R&D to industrialization. Furthermore, the company sets up its production bases with its partners in Chengdu, Sichuan and Xi'an, Shanxi for customer synthesis and customer manufacturing from KG to several hundreds tons.

STC has professionals who have years of experience in chemicals' export and import. 90% of our total sales is export to Japan. We have great collaboration with many well-known enterprises in Japan, and be well praised and preferred by all customers.

STC specializes in all kinds of OEM business for functional material, pharmaceutical and pesticides' intermediates. Professional technologists are assigned to be in charge of each project management in order to offer customers the best quality and technology support. Having the long-term cooperation with over 10 manufactories, STC is able to do various chemical reactions, such as Hydrogenation with high temperature and pressure, hydrogenation, Coupled reaction, Halogenating Reaction, Grignard Reaction, Diazotization, Phosgenation, and Low temperature reactions.

Shanghai Time Chemicals Co., Ltd. sincerely welcomes all customers to visit and guide.
