

QBit Semiconductor LTD.

Company Description

QBit was formed in 2016 by a team of former Qualcomm imaging engineers. QBit's origins actually date back to the 1990s, to a Boston-area start-up called Pixel Magic, which underwent a series of acquisitions into Oak Technology, then Zoran, CSR and finally Qualcomm. The QBit team is energized to now bring our expertise to market as an independent company.

QBit's engineering team is in Taipei, Taiwan and Boston, Massachusetts.

Company Details

Head Office

Taiwan

Main Business

designs system-on-chip (SOC) integrated circuits for smart imaging and smart edge devices.
