

ReYuu Japan Inc.

Company Description

ReYuu Japan Inc. was established in June 1988. We are a leading used mobile phone wholesale trader and distributor in Japan. Based on the know how we have built up through our track record with the major telecommunication companies and our directly owned business track record, we lead the market as a pioneer in dealing with used cell phones within Japan.

Introducing our products

Our company is dedicated to providing smart phones, tablets and PCs. We offer a diverse range of models from major overseas manufacturers and leading Japanese brands. We specialize in handling popular smart phones such as iPhone, Galaxy, Xperia, along with tablets and PCs like iPad and MacBook from various business partners.

The exceptional quality of our products has garnered high praise from numerous customers. We meticulously erase data and conduct thorough cleaning processes to restore them to premium quality. Additionally, our inventory includes not only used items but also a wide selection of new, unused outlet goods.

Our company restores phones in accordance with a set of guidelines created by "Reuse Mobile Japan," an association for used mobile phones in which the Ministry of Internal Affairs and Communications participates as an observer. These guidelines are designed to assess the safety and performance of phones, and our company categorizes products accordingly.
